## Operation: Reality Check - Storm Surge Markings

"Operation: Reality Check" is an initiative aimed at ensuring that Duval County residents who live in a storm surge zone know their evacuation status and have a personal disaster plan for themselves and their families. The map shows where markings have been placed around town and at the beaches demonstrating the maximum height of storm surge at each hurricane category level. **Storm surge** is the abnormal rise in water level caused by wind and pressure forces of a hurricane or tropical storm. Levels represented here are the "maximum of maximums."

Negative numbers mean there will be no storm surge at that site.
